DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: On page 5, line 9 appears to be awkwardly phrased.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 3, line 2, "plane" has no clear antecedent basis.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3612

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 3, 6, 8 and 9, as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Davis.

Davis discloses the claimed invention including a metal sheet having a plurality of openings to define a screen, and vertical and horizontal strands defining the openings. The strands are formed with a semicircular section defining ribs. The screen of Davis is capable of being used for the side of a work vehicle cab.

Re claim 3, since the plane of the screen can be drawn anywhere through the strips forming the screen, a plane can be drawn so that the ribs extend from 0.04 to 0.08 inches from this plane. Thus this claimed feature is considered to be an inherent feature of the Davis reference.

6. Claims 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Gruetjen.

Gruetjen discloses the claimed invention including a metal sheet having a plurality of openings to define a screen, and spaced strips of material forming a periphery to define the openings. The strips include ribs 9 that extend from opposite sides of the screen. The screen of Gruetjen is capable of being used for the side of a work vehicle cab.

Allowable Subject Matter

7. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

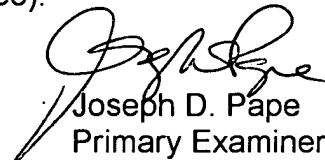

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The other cited references show other screens that are similar to that of the current invention.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph D. Pape whose telephone number is (703) 308-3426. The examiner can normally be reached on Tues.-Fri. (6:00-4:30).
